Company Name: In House R&D

Project Title: Survey of best practices for Software R&D

Funding: Enterprise Ireland Innovation voucher

InHouse R&D provides consultancy to software based companies in Ireland on how to ensure their R&D projects meet the rigorous standards set forth to claim R&D Tax Credits for their projects. We work with SMEs to Multi-nationals to realise the value of high impact research, while being compliant with revenue legislation.

PROBLEM TO BE SOLVED

Seeking to validate best practices in applying R&D principles to software intensive projects, in particular those that follow Agile methods.

HOW GATEWAY DELIVERED SOLUTION FOR INDUSTRY

Carried out a survey of recent software intensive research projects carried out by TSSG, distilling the R&D practices used in H2020, EU, SFI and EI funded projects. The results helped to better align InHouse R&D own methodologies.

IMPACT FOR THE COMPANY

The survey, carried out in partnership with the world class R&D centre of TSSG helps to bring further validation of our unique approach to starting and running R&D projects for industry in Ireland, so that they can get the best impact for the company and benefit the most from Revenues R&D Tax Credit.

COMPANY TESTIMONIAL

TSSG were professional and knowledgeable in the field of software intensive R&D. They are a world class resource for all Irish companies from SMEs to Multi-nationals
